PROFESSIONAL SUMMARY

Software Engineer with a passion for building scalable and efficient solutions. I have a strong background in full-stack development, specializing in modern front-end frameworks like **React** and robust back-end systems built with **Java** and **C#**. My expertise includes deploying and maintaining applications on **Azure** and using **CI/CD** pipelines to streamline development. I am a firm believer in using technology, from automation to machine learning, to solve complex problems and drive business growth.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript, Node.js, React, Angular, Tailwind CSS, Bootstrap, PHP
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools & Platforms:** Git, GitHub, VS Code, Jira, Perforce, Swarm, Robot Framework, Cypress
- **AI & Automation:** TensorFlow, OpenCV, Chat-GPT, Gemini, Copilot
- **Methodologies:** Machine Learning, Natural Language Processing (NLP), Data Analysis, Agile, UI/UX Principles

WORK EXPERIENCE

- **Software Engineer** [*LNW India Solutions Pvt Ltd*] August 2022 – Present
 - Spearheaded the migration of over 15 enterprise applications, **moving from AngularJS to React.js**, and architected a new front-end framework with **Redux** that improved efficiency by over **60%** and enhanced overall system maintainability.
 - Architected and deployed a scalable **microservices** infrastructure on *Microsoft Azure*, utilizing **Docker** and **Kubernetes** to achieve **99.9% uptime** and reduce deployment cycles by **50%**.
 - Pioneered a robust quality assurance strategy by implementing **Test-Driven Development (TDD)** and leading comprehensive testing efforts with **Jest** and **Cypress**, ultimately reducing production bugs by **70%**.
 - Contributed to the development of a suite of microservices in **Java Spring Boot** to manage player accounts and loyalty programs, securely handling user data and integrating with **RESTful APIs** to deliver personalized rewards and a seamless player experience.
 - Drove automation initiatives using **Robot Framework** to streamline QA processes, which increased the quality of development by **40%** and significantly reduced the bug count.
 - Served as a key technical contact for customer deliverables, providing expert post-deployment support and leveraging advanced **SQL** and **C#** log analysis to quickly resolve critical production issues.
 - Fostered a high-performance team culture through **Agile/Scrum** methodologies, mentoring junior developers and a fresh batch of **40 interns**, which helped the team deliver features **25% ahead of schedule**.
- **Machine Learning Intern** [*Samsung Research Team*] July 2020 – March 2021
 - Engineered a **Neural Machine Translation (NMT)** system for Indian languages, contributing to the development of an English-to-Hindi translation model.
 - Utilized advanced **NLP** techniques and the **TensorFlow** framework, achieving an accuracy of **70-80%** for the translation model.
 - Collaborated with a team of **12 members**, including college teachers and mentors from the Samsung R&D team, to drive project outcomes.
 - Managed and preprocessed large, multilanguage datasets to prepare the corpus for model training and validation.
 - Gained hands-on experience in a research and development environment, focusing on improving model accuracy and performance in a real-world application.

• **Machine Learning Intern** [Quant Masters Technologies Pvt. Ltd.]

August 2021 – October 2021

- Spearheaded the "Amazon Sentiment Analysis" project, applying a variety of **machine learning algorithms** to a large dataset of customer reviews.
- Developed and deployed **supervised learning models** to classify sentiment from unstructured text data, achieving an accuracy of over **85%**.
- Independently managed the project from data acquisition to model deployment, showcasing strong ownership and self-direction.
- Enhanced data insights and delivered actionable business intelligence by transforming raw data into meaningful strategic information.

PROJECTS

• **Smart Kissan: A Farmer's Resource Platform** [Technologies: HTML, CSS, JavaScript, Java, Spring Boot, MySQL]

- Developed and launched a user-centric web platform, "Smart Kissan," using **Java Spring Boot** and **MySQL** to provide farmers with vital agricultural resources.
- Designed and built an intuitive user interface from scratch, which led to a significant improvement in information accessibility and user engagement.
- Implemented a secure backend API with role-based access control and token-based authentication with **JWT** to ensure robust security for all application endpoints.
- Awarded the "**Best Project Award**" for its innovative and practical utility in the agricultural sector.

• **Airlines Management System** [Technologies: HTML, CSS, PHP, MySQL]

- Engineered a full-stack system with **PHP** and **MySQL** to manage airline operations, handling flight scheduling, passenger records, and ticket bookings.
- Designed and implemented a robust database schema to efficiently manage large volumes of user and flight data, ensuring data integrity and high performance.
- Developed key functionalities, including user authentication, booking, and cancellation processes, and a detailed flight search engine.
- Created a responsive web interface to ensure a seamless booking experience across multiple devices.

• **Driver Drowsiness Detection System** [Final year project | Technologies: Python, OpenCV, TensorFlow]

- Developed a real-time system using **Python** and **computer vision** to monitor a driver's state and detect signs of fatigue.
- Implemented a Convolutional Neural Network (CNN) model using **OpenCV** and **TensorFlow** to accurately analyze landmarks in the eye and facial.
- Designed and integrated a voice-based alert system that triggers real-time audio warnings to the driver after detecting drowsiness, enhancing road safety.
- Managed the project from data collection and model training to final system integration and performance testing.

EDUCATION

Bachelor of Engineering in Computer Science

Vishweshwaraiah Technological University

2018 – 2022

CGPA: 8.9

P.U.C (PCMC)

St. Charles Composite PU College, Bhadravathi

2017 – 2018

Percentage: 92.66%

CERTIFICATIONS

- HTML5 – Coursera
- Python (Basics & Advanced) – Persistent Foundation
- Data Science – Persistent Foundation
- Java Training – IIT Bombay Spoken Tutorial
