Summary

Information Science graduate with internship experience and a strong foundation in software development, programming, and problem-solving. Skilled in building applications using modern technologies and eager to contribute to innovative and impactful solutions in an entry-level role.

Skills

Languages: C#, Java, C, C++, Python, JavaScript

Frameworks: .NET, ASP.NET Core, React.js, HTML, CSS, REST APIs

Databases: SQL Server, MySQL, MongoDB

Core: OOP, DSA, DBMS

Tools: Git, GitHub, Visual Studio, VS Code, Swagger, GitHub Copilot, ChatGPT, Claude, Gemini

Experience

MindMatrix.io

Feb 2026 – May 2026

Android Application Development Intern (Generative AI)

Bengaluru

- Developed Reshme Namma Pride, a Generative AI-powered Android application using Kotlin and Jetpack Compose, enhancing user experience on the MindMatrix platform.
- Performed testing, debugging, and documentation, reducing reported defects by 20%.

Samsung Research

Jul 2025 – Jan 2026

Full Stack Development Intern

Bengaluru

- Developed enterprise workflow modules using React.js and implemented REST APIs using C# and .NET for an internal workflow management system.
- Implemented new features, performed API integration, debugging, testing, and bug fixes across 5+ workflow modules while collaborating using Git in an Agile development environment.
- Collaborated with the project manager and team members through daily status updates, sprint discussions, and technical meetings.

Projects

Reshme – Namma Pride | Kotlin, Firebase, Google Gemini AI, Jetpack Compose

- * Built a Generative AI-powered Android application for sericulture farmers with climate monitoring and localized agricultural guidance.
- * Implemented offline-first architecture using Room Database and Firebase synchronization to maintain functionality during network outages.

HireHub | MongoDB, Express.js, React.js, Node.js

- * Developed a full-stack job portal with JWT authentication and Role-Based Access Control for recruiters and job seekers.
- * Implemented resume upload functionality using Multer and built an applicant tracking dashboard to streamline hiring workflows.

Automated Shopping Cart | RFID, NodeMCU ESP8266, Arduino IDE

- * Designed an IoT-based shopping cart system using RFID and NodeMCU for automatic product detection and billing.
- * Reduced average checkout time by 70% through automated item detection and real-time bill generation.

Education

Cambridge Institute of Technology

2022 – 2026

Bachelor of Engineering in Information Science / CGPA: 8.45

Bengaluru

BGS Gurukula Independent PU College

2020 – 2022

PCMB / 88.16%

Bhadravathi

SAV High School

2019 – 2020

SSLC / 90.54%

Bhadravathi

Certifications

React JS (Simplilearn) **c#** (Infosys Springboard) **Java Fundamentals** (Coursera) **Software Engineering Job Simulation** (Forage)
